Project title :- MyELib

Team members:

Mulla Hawa K.(hawa4frnds@yahoo.com)

Kapopara Eeva N.(Kapoparaeeva.uis@gmail.com)

Our project is all about the library functionality. This project can be used in any sector wherever library is there. For example schools, colleges, any other educational institutions, etc.

As we have considered our college's library we have made database as per its requirement but to implement at any other sector we may just need to change, add or remove only one or two fields. It can also be used in educational institution for providing students with different subjects' ppts and all other required study materials.
